

# The Neutralizer

## 10 FACTS Every Cell Phone User Should Know Before It's Too Late

### Did You Know

**YOUR BRAIN has no pain receptors to give any warning of pain or damage while your phone is being tightly pressed against your head?**

1. Cell Phones were created for emergencies.
2. **Cell Phones have never been proven safe.** The FDA even exempted cell phones from having to meet any type of safety compliance prior to consumer use. The only other time such an exemption was granted was with cigarettes.
3. Microwave radiation used in wireless communication acts similarly to microwave oven radiation **they both cook.** Microwave ovens use high power and heat is detected; cell phones use low power and heat may or may not be detected. What's frightening is that your brain has no pain receptors to give any warning of pain or damage while your phone is being tightly pressed against your head.
4. Cellular phone manufacturers do not want you to know that the latest studies confirm that the use of a cell phone can damage the DNA in sensitive areas on your brain
5. Contrary to popular belief, brain tumors and brain cancer are not the only conditions found to be linked to the cell phone use. Based on the evidence of hundreds of documented, duplicated, published and peer-reviewed scientific data from the global research efforts of multiple governments, world renowned scientists, biophysicists, epidemiologists, and industry-hired experts, **over 50 adverse health effects have been linked to exposure.**
6. **Cell phone radiation has repeatedly been proven to have a consequential impact on every major bodily system.** Exposure primarily influences the nervous system in the way of headaches, memory loss, fatigue, concentration difficulties, etc. Abnormalities to the reproductive system include impotence and erectile dysfunction, as well as a reduction in sperm count and sperm quality which has led to problems of infertility.
7. Using an ear-piece will not prevent the harmful radiation from reaching your brain.
8. DNA damage from radiation exposure is cumulative, increasing your risk each time you use your phone.
9. Leading researchers have even gone so far as to say that the adverse effects of smoking will pale in **comparison to those of long term microwave radiation exposure.**
10. **Children are at maximum risk;** the younger the child, the greater the risk.

## Research Discovered The Problem & Research Provided The Solution!

### Research Discovered the Problem

Emitted electromagnetic radiation from cell phones were shown to have a statistically significant detrimental effect on the human DNA. This effect was observed even with cell phones in standby mode.

There is substantial scientific evidence that cell phone radiation is harmful to the body. **Experts like: Dr. Oz, Dr. George Carlo and Dr. Mannie Alvarez have publicly warned on the dangers of exposure to electromagnetic field from cell phones. Be wise, protect yourself, your loved ones and tell your friends and neighbors how they too can protect themselves.**

### Research Provided the Solution

Research into the cause and effect of EMF radiation has shown that NEUTRALIZER is the only product on the market with in-vitro studies that prove human DNA can be protected from the damaging effects of EMF / RF (Electromagnetic Radiation / Radio Frequency).

Research has shown that when NEUTRALIZER is attached to the cell phone, it neutralized the effect of EMFs on human DNA and protects human DNA from damaging effects produced by cell phones

The NEUTRALIZER is lab tested, scientifically proven, and peer reviewed in scientific journals and makes any wireless phone harmless to adults, children, and the unborn.

### Features:

- Patented protection.
- Works on any cell phone, cordless phone, or laptop.
- Protects in both "Standby" & "Talk" Modes
- Effective & affordable solution to cell phone radiation.
- Effectiveness will not diminish over time.
- Never needs to be replaced and can be transferred to other phones (if installed in battery compartment that remains dry).
- Looks great on any phone & on other Electronic Devices.
- Wafer thin and easy -to- apply or install.
- Circumference: slightly larger than a quarter.
- Weight: about the same as a postage stamp

### Recommended Uses:

- Cell Phones
- Earpieces
- Cordless Phone Handsets & Base Units
- Two-Way Radios / Walkie -Talkies
- Baby Monitors
- Wireless Internet Modems
- Microwave Ovens
- Laptop Computers

### Installation Options

The Neutralizer is convenient, easy to use and easy to install- Just peel the backing from the disc, and apply it to any flat, smooth surface on your cellular phone or other electronic device. The adhesive will stick to almost any surface, providing constant protection for as long as it remains on the device.

**Obtain Your Neutralizer From Your Local Agent:**

Or

**Direct your inquiries to:**
